

FLOOR DRAIN TRAP PRIMER FRESH WATER DISTRIBUTION SYSTEMS

PATENT NUMBERS 3,776,269 - 6,325,091

JUST THE FACTS:

The Trap Priming Distribution Systems are patented designs that incorporate both copper and PVC materials. These designs give the installer a simple and positive means to prime multiple floor drains using only one Precision Plumbing Trap Priming Valve.

It is our recommendation that the distribution unit be mounted level. The fresh water supply line, running from the distribution unit to the trap, must be a minimum of 1/2" O.D. copper tube.

FIG 1 Example Installation of 2 drain setup using P2-500 primer & DU-U.

INSTALLATION DIMENSION (see fig. 1)

PRIMER MODEL

	DU-4	DU-U
P-1	10 1/2"	9 3/4"
P-2	10 1/2"	9 3/4"
OREGON #1	12"	11 1/4"
PRIME-RI TE	11	10 1/4"
